

Consulting. Technical Teams. Platform. Operations Support.

The Zero-Gaps IT Solution for Manufacturing OT

Master OT complexity with total visibility and control – strengthening security, reducing downtime costs, and ensuring compliance to protect operations and drive business performance.

What ZERO GAPS Means

Secures Every Part of OT

From factories to legacy systems – every site, asset, and connection protected.

Covers Every Step

From first blueprint to daily operations – every stage secured, no gaps left open.

Strengthens your Existing Stack

Closes gaps across existing tools and vendors – from CrowdStrike to ITSM APIs.

Adapts as Risks and Needs Evolve

Maintains Zero Gaps, as your needs, systems, technology and threats change.

Benefits for You

Compliance

A Unified IT Framework Built for OT Realities

- Traditional OT solutions rely on isolated tools and one-off integrations
- OT Pulse delivers a fully integrated, IT-grade framework powered by the OT Pulse Matrix
- It connects monitoring, secure access, automation, and service management across all applications
- The result: unified data, real-time visibility, and end-to-end control – combining IT-level scalability with OT-level practicality

Discover | Monitor | Manage

OT PULSE in Action

1. Establish a Clear OT Baseline

- Asset inventory and topology mapping
- Protocol analysis (IP, Modbus, OPC, Profinet)
- Detection of unmanaged and shadow systems

2. Put Governance into Practice

- Role-based access controls (RBAC)
- Network segmentation & security design/ deployment
- SIEM/SOC integration
- Framework alignment (NIS, NIST, IEC 62443)

3. Maintain Secure, Stable Operations

- Incident response support
- Continuous monitoring & anomaly detection
- Dynamic firewall rule adjustments
- Patch planning & secure change guidance
- 24/7 dashboards and ticketing
